

Taskbar – bottom, top, left, right

With the latest update, Microsoft has introduced the option to place the taskbar at the top, bottom, left, or right.

Some users might appreciate this!

The latest update from August is required (I have build 26200.9278).

You can configure this in the settings under Settings > Personalization > Taskbar > Taskbar behaviors

german windows, sorry

This lets you move the taskbar to whichever side you want!
