

Quickly Launch the Snipping Tool with a Single Key

The Snipping Tool

(for creating screenshots or screen recordings of specific areas or the entire screen)

Start with:

The old print function works with:

 +  = Screen

 +  +  = Active screen with two or ...

 +  = Active program

You can... the old key combination.

If you would like to have video mode set as the default right from the start, that is also possible: (but three buttons again 🤖)
